CONSTRUCTION NOTIFICATION

**S. Hamilton Road at Higgins Boulevard/Directors Boulevard
Intersection Improvement Project**

September 11, 2020

=====

Contact: Stephen Farst, City Engineer
614-836-5301

sfarst@groveport.org

The Public, motorists, businesses and public agencies are advised that construction for the above referenced project will commence on or about September 21, 2020.

The project involves construction of intersection improvements at this location (near 4400 S. Hamilton Road, 43125) that will include re-alignment of the north- and south-bound left turn lanes on South Hamilton Road at the intersection, removal and replacement of traffic signal equipment, and construction of pedestrian accommodation. Fall 2020 road construction will occur until about October 31, 2020, during which time workers will make improvements to the left turn lanes at the intersection along South Hamilton Road, and to complete paving. New traffic signal equipment will be installed in early 2021. Weather may affect the schedule.

Changes in traffic patterns: Travelers are advised that during daylight hours between 9 am to 4 pm, temporary daily lane closures and restrictions will be made to allow for construction to occur and for the safety of the workers. Lane reduction to one-lane each direction near the intersection will be arranged during these hours and turns at the intersection will be allowed. The contractor is required to remove the lane closure beyond these hours on a daily basis. Public advisories are further described:

- Travelers along S. Hamilton Road (SR 317) in the construction zone between Williams Road and Firehouse Lane can expect congestion and possible delays and should use caution when traveling on South Hamilton Road throughout the construction. Alternate plans are suggested, if possible.
- Travelers may incur delays entering and exiting the intersection. Businesses located on Directors Boulevard and on Marketing Place are encouraged to use the Marketing Place entrance off of Williams Road, to avoid the intersection.

(continued next page)

- The contractor will have flaggers and law enforcement officers (LEOs) as needed, in the construction zone to assist travelers.

General Comments/Tips:

- During construction activities, our contractor will maintain traffic flow and allow turns at the intersection, but some disruption may occur that may last a few minutes. We ask that you please respect workers safety and that you follow flaggers' and LEO's instructions. Please travel slowly and with caution.
- Please be advised it is illegal to touch or alter placement of barricades or signage.

We appreciated your patience during this time. As always, please drive slowly and with caution.
