

Welcome to the City of Groveport Stormwater Management Page! Here you will find news and events for upcoming programs and activities related to stormwater.

The City of Groveport manages a stormwater program in accordance with its Municipal Separate Storm Sewer System Permit (also known as a MS4 permit) issued by the Ohio Environmental Protection Agency.

Recent Activities – July through September, 2020

- In July inspections were conducted at 4 construction sites covered under the Ohio EPA Construction General Permit for stormwater related discharges (Startech, Eastland Fairfield Career Center, Hickory Grove Phase 3 and Saltzgaber Mass Grading). In August there were also 4 construction sites inspected for stormwater related discharges (Startech, Eastland Fairfield Career Center, Hickory Grove Phase 3 and Saltzgaber Hemmer). In September each of the 4 above mentioned sites were again inspected for stormwater related discharges. In addition, a Pre-Construction Meeting was held in August for the Saltzgaber Hemmer Development Project;

- A quarterly Stormwater Inspection was conducted at the City Maintenance Facility;

- Two stormwater pollution prevention plans and operation and maintenance plans were approved in September. They are the Port Road Development Project and the Redwood Development Project. Bedrock Earthworks stormwater pollution prevention plan was also approved in September.

If you observe a stormwater violation you would like to report to the City, please contact us at 614-836-5301 or send an email to stormwatercompliance@groveport.org. Stormwater violations include, but are not limited to, sediment running off of construction sites, spills and dumping of chemicals, fuels or any other non-stormwater materials, including trash, into the storm sewers.

Thanks and remember, our stormwater ends up in the creeks and rivers in Groveport so let's keep our natural areas clean!
